January 27-28, 2017
Impact Assessment Survey

Physician Survey Results
Total number participants: 271
Number of Physicians Surveyed: 155  Number of Responses: 20  Response Rate: 13%

Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)
- PRECISION MEDICINE (20%)
- TYROSINE KINASE INHIBITORS (0%)
- IMMUNOTHERAPY (25%)
- PROSTATE CANCER (20%)
- INFORMATION TECHNOLOGY (15%)
- GENOMIC MEDICINE FOR WOMEN’S CANCERS (25%)
- BREAST CANCER (60%)
- SURGICAL ONCOLOGY (35%)
- RADIATION THERAPY (40%)
- IMAGING APPLICATIONS (25%)
- TEAM MANAGEMENT FOCUS (20%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.
- Technology. (2)
- Lack of patients.
- Finances.
- Lack of technology.

Since, and because of your participation at this conference, how many patients have you impacted by what you learned at the activity?
- 1-5 (45%)
- 6-10 (1%)
- Over 10 (35%)
- Not Applicable (15%)

Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?
- Excellent meeting. (2)
- Very informative. (2)
- Loved meeting the physicians.
- Please keep continuing such highly informative CME’s.
- Very well organized symposium.
- Should do it again and use some of our local doctors.
- Very good overview of many facets of oncological care.
- Excellent mix of topics.

What Institute are you from?
- Baptist Hospital MCI (5)
- BHSF (4)
- HHC (2)
- Hospital Clínica Bíblica (2)
Family Medicine Conference: Sleep Disorders and Sleep Studies
February 2, 2017
Impact Assessment Survey

Physician Survey Results
Total number participants: 9
Number of Physicians Surveyed: 9   Number of Responses: 3   Response Rate: 33%

Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)
- I have implemented a sleep symptomatology evaluation into my practice in an effort to appropriately diagnose and treat sleep-related disorders and ultimately reduce risks of co-morbidities. (0)
- There have been instances when I associated a patient’s sleep disorders with other general medical and cardiovascular diseases. (100%)
- There has been improvement (in your practice) with effectively conveying to patients the benefits of proper and compliant treatment of sleep disordered breathing in preventing and improving outcomes for hypertension, cardiovascular disease, cardiac arrhythmia, cerebrovascular disease and depression. (66%)
- I have experienced improved clinical competencies and/or performance related to the diagnosis and treatment of sleep-disordered breathing and/or association with other medical diseases/conditions. (33%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.
- Lack of time.
- Lack of material and tools.

Since your participation at this conference, how many patients have been impacted by what you learned at the activity?

1-5       (33%)
6-10      (66%)
Over 10   (0%)
No Impact (0%)

Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?
- Understanding MACRA.
- I'm going to conferences often as much to verify that I'm still doing the right thing, through my reading and keeping up, and now hearing it "from the horses mouth" as to learn new things in order to change what I'm already doing. But it's always great when I do find something completely new that causes me to change something that I may have not been doing right or not been doing it all.
- I think you could after conferences on the various official guidelines for treatments of common diseases that have changed recently and the reasons for the change, and any controversies concerning those reasons."
Miami Cardiac & Vascular Institute Grand Rounds: Evaluating and Treating Dyslipidemia in the Cardiometabolic Syndrome
February 15, 2017
Impact Assessment Survey

Physician Survey Results
Total number participants: 30
Number of Physicians Surveyed: 17  Number of Responses: 3  Response Rate:

Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)
- I can describe the components of Metabolic Syndrome. (66%)
- I understand and recognize the principles in lipid guidelines. (33%)
- I am able to identify appropriate candidates for lipid intervention beyond statins. (66%)
- I have implemented evidence-based recommendations for non-pharmacological and pharmacological lipid therapy for the management of Metabolic Syndrome. (33%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.
- None listed.

Since your participation at this conference, how many patients have been impacted by what you learned at the activity?
- 1-5 (33%)
- 6-10 (33%)
- Over 10 (33%)

Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?
- Continue with this type of conference, they are really very good.
Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)

- I actively promote lifestyle interventions in patient care to decrease chronic disease risk and achieve optimal patient outcomes. (86%)
- I apply strategies to identify common conditions which indicate heart disease as co-morbidity, such as sleep apnea and type-2 diabetes. (86%)
- I recognize evidence-based recommendations for the medical and surgical management of obesity to improve patient outcomes. (100%)
- I follow current cholesterol lowering therapy guidelines to reduce the risk of heart attack and stroke. (71%)
- I reflect on the results and conclusions of the most relevant studies that evaluate the role of HDL as a CVD risk factor to improve patient outcomes. (14%)
- I apply the National Lipid Association recommendations for patient-centered management of dyslipidemia. (43%)
- I consider new technologies that are being developed to further advance the minimally invasive and interventional treatment of valvular heart disease. (43%)
- I examine prevention, reversal and treatment strategies for heart failure, considering medical and surgical options. (71%)
- I implement atherosclerosis imaging testing in CVD risk reclassification to guide management decisions. (29%)
- I recognize the latest and emerging interventional radiology technology and procedures poised to improve the testing, diagnosis and management of cardiovascular disease. (43%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.

- None listed.

Since your participation at this conference, how many patients have been impacted by what you learned at the activity?

1-5 (33%)
6-10 (33%)
Over 10 (17%)
No Impact (17%)

Please describe one or two patient outcomes you have observed related to your enhanced use of the above strategies you learned at this symposium.

- Stroke prevention treatment with statins.
- Lipid management with history of diabetes.
- Diet Improvement, better health choices and stimulating the ideas of better health through proper eating and physical activity.
- I have always actively promoted lifestyle interventions to my patients and so this was more motivation to do so, and I constantly see the benefit of doing this.
- I am more aware of checking for sleep apnea in the non obese patient. I have not seen any definite outcome as yet, but I am sure that I will.
- Good changes.
- Discussion on weight loss and to exercise more.
- Better lipids with enhanced use of ezetimibe.
- More detailed dietary instructions to patients.
Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?

- Vegetarian life.
- Organic versus non-organic.
- Meat versus vegetarian.
Physician Survey Results

Total number participants: 108
Number of Physicians Surveyed: 45  Number of Responses: 4  Response Rate: 9%

Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)

- I can explain the proper use of direct acting antiviral agents in the hepatitis C virus (HCV) infected chronic kidney disease (CKD)/ end stage renal disease (ESRD) patients. 3 (75%)
- I can identify nephrocalcinosis in patients that do not pass a kidney stone. 3 (75%)
- I can assess cases highlighting the pathogenesis of glomerular disease. 1 (25%)
- I can implement appropriate treatment plans for challenging glomerular disease processes. 1 (25%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.

- Content not applicable to my practice. (2)

Since your participation at this conference, how many patients have been impacted by what you learned at the activity?

- 1-5 (50%)
- 6-10 (0%)
- Over 10 (0%)
- Not Applicable (50%)

Please describe one or two patient outcomes you have observed related to your enhanced use of the above strategies you learned at this symposium.

- Exercise and cardiovascular disease.

Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?

- To continue presenting same kind of topics as in this symposium would improve our better understanding of the proper use of the new antiviral agents in HCV infected CKD/ESRD patients, the importance of pathologic features for the final diagnosis and proper treatment of different types of GN pathologic types.
- More about the new diagnostic tests in Glomerular disease, about IgA Nephropathy, Lupus Nephritis, or other Nephrology topics.
- These activities provide me an opportunity to be updated by clinical experts on their fields.
Physician Survey Results
Total number participants: 187
Number of Physicians Surveyed: 79    Number of Responses: 12    Response Rate: 15%

Since, and because of your attendance at this conference, which of the following new strategies have you implemented in your practice? (Check all that apply)
- I can explain treatment modalities, prognosis and clinical management available to patients diagnosed with HPV. (33%)
- I can differentiate the molecular biology of HPV positive cancers. (0%)
- I can assess recent data which includes trends and projections to assist with screening and prevention in the epidemiology of HPV. (40%)

If you have not implemented any of these strategies since the conference, what has prevented you from doing so? Please list any barriers that might keep you from applying the strategies listed above.
- Current practice is satisfactory. (2)
- Content not applicable to my practice.

Since your participation at this conference, how many patients have been impacted by what you learned at the activity?
1-5    (13%)
6-10   (7%)
Over 10 (33%)
No Impact (27%)

Considering this conference and your ability to implement improvements in your practice, what additional topics, information or tools could Baptist Health CME offer during future conferences to help you achieve change?
- Anything that would help in daily clinical practice and would benefit the patient with treatment or information.
- BH conferences are already terrific as regards patient health. Because of the tremendous news about cyber attacks maybe we could get a speaker on that subject since there is the ransom ware stuff, identity theft, etc
- Would like occasional email updates during the year, recent research, articles, on clinical topics discussed in lecture.
- I see many HIV+ patients in my work as a dentist so I am especially interested in oral cancer as it relates to HIV. Symposia have been most interesting and educational.
- I came to this conference to learn about something I had heard about but do not see in my practice. I found it very informative and exactly fit the needs for my educational if not practice goals.
- Love the proton beam and its application. Maybe we can see it at some point in time.
- Effects of head and neck radiation. I would like to hear from speech pathologist about techniques to help with dysphagia. Also more about pegs.
