Baptist Health

Welcome Letter

Dear Site Coordinator,

The Kathryn Krickstein Pressel MammoVan travels South Florida to provide early breast cancer detection services and breast health education. The MammoVan is an extension of the Christine E. Lynn Women's Health & Wellness Institute and the Schmidt Family Center for Breast Care at Boca Raton Regional Hospital.

Since 2010, we have served over 13,000 women and visited over 200 sites each year. We are proud to provide access to women in our community who might not otherwise be able to get a mammogram.

Our mobile mammography program provides every patient with an array of specialized services including:

- State-of-the-Art Equipment
  - The Pressel MammoVan houses low-dose 3D Mammography units
- Specialized Team of Professionals
  - All exams are read by fellow-trained breast radiologists
  - Each technologist is board-certified in mammography
- Sophisticated Analytic Software
  - Density software analyzes the images to determine your breast density and risk score
  - ProFound AI software is used to assist the radiologist in detecting and prioritizing suspicious areas in the mammogram
- Personalized Risk Assessment
  - Breast risk assessment to calculate a woman's lifetime risk for developing breast cancer
  - Hereditary cancer risk assessment that screens women who have an elevated risk for 11 types of cancers
  - Cardiovascular health risk assessment through the identification of calcified arteries of the breast seen on mammogram images
- Supportive Care
  - Exam results are available within 3 business days
  - Patients with abnormal results are called directly and our team navigates them through their next steps
  - Our navigation team is available to answer questions, provide follow-up care while working through any barriers to care
- Financial Support
  - Baptist Health South Florida is committed to providing charitable care to those in need and offers financial assistance to underinsured patients

There is no cost to bring these services to you. Our mission is to save lives through early detection, education, and by effectively removing barriers to access.

Thank you for choosing the Pressel MammoVan!
